AI at IXL

AI that your teams use every day.

Most AI pilots never reach daily work. We agree the decisions first, redesign the work with the people who do it, and put AI agents live in 90 days.

1 Is this your issue?

AI is on every board agenda, but few companies see it in their numbers.

Pilots that never scale
Experiments everywhere, value nowhere.

Nobody owns the outcome
IT builds, the business waits, results are unclear.

People don't use it
Tools land on top of old ways of working.

Risk is unmanaged
No rules for data, governance or what AI should not touch.

QUESTIONS LEADERS ASK US

- ? Where does AI create value for us?
- ? How do we get agents live in 90 days?
- ? How do we govern AI?
- ? Are we ready for AI?
- ? Can AI make our strategy smarter?
- ? How do we measure AI's value?

If you answered yes to any of these, read on.

2 Is there a solution?

Yes: one AI journey in three stages, run on our own AI platforms.

AI at IXL

AKAIO, our AI strategy platform, takes you from trends to a funded portfolio. CIO Review named it a Top AI-Powered Platform in 2025.

ConnectLoop, our AI agent platform, lets the people who do the work build and run their own agents.

1 **Jump Start**
AI leadership workshop, readiness assessment and an AI plan.

2 **Breakthrough Results**
Innovation 5.0, AI implementation and AI for new businesses.

3 **Capability Building**
AI Academy, governance and quarterly value tracking.

THREE RULES FOR EVERY AI PROJECT

RULE 1

Start with outcomes, not technology

We start with the business result, then choose the tools.

RULE 2

Rethink the work before building

Automating a broken process only makes it fail faster.

RULE 3

Measure the baseline before launch

So the value is clear later.
